

9.5 Taxi Speed Limits

Taxi speed is critical for:

- Safety
 - Passenger comfort
 - Ground operations
-

Standard Taxi Speeds

- Normal taxi → approx. **20 kt**
 - Outside apron → max **30 kt**
-

Special Cases

- High-speed exit → **40 kt (max 50 kt)**
 - Tight turns → max **15 kt**
-

Operational Importance

Excessive taxi speed increases:

- Brake wear
 - Risk of runway/taxiway excursions
 - Passenger discomfort
-

Core Rule

“Taxi speed must always match environment.”
